REASONS FOR ALLOWANCE

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a floating-point multiplier and accumulator for performing multiplication and addition operations comprising: a multiplier array for providing a sum and a carry; multiplexor circuitry coupled to the multiplier to selectively bit shifting each of the sum and the carry; a shifting circuitry; an adder circuitry; and a feedback circuitry coupled to the adder circuitry and the multiplier array as cited in all independent claims 1, 11, and 14.

The closest found prior arts are Blomgren et al. (U.S. 6,275,838) and Zou et al. (U.S. 6,425,070). Blomgren et al. in view of Zou et al. disclose or render an obviousness of a floating-point multiplier and accumulator for performing multiplication and addition operations comprising: a multiplier array; a shifting circuitry; an adder circuitry; and a feedback circuitry coupled to the adder circuitry and the multiplier array. However, Blomgren et al. in view of Zou et al. fail to disclose the floating-point multiplier and accumulator including the multiplexor circuitry coupled to the multiplier to selectively bit shifting each of the sum and the carry as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
